

2025 KNOWLEDGE-BASED HOME-STUDY CE FOR PHARMACISTS AND PHARMACY TECHNICIANS

Update on the Prevention and Treatment of HPV Infection

Speaker:

Joseph V. Etzel, Pharm.D.

Associate Clinical Professor

College of Pharmacy and Health Sciences

St. John's University, Queens, NY

Activity Type:

Knowledge

Target Audience(s):

Pharmacists

Pharmacy technicians

Learning Objectives

Upon completion of this CE activity, the participant will be able to do the following:

PHARMACIST & PHARMACY TECHNICIAN LEARNING OBJECTIVES

Learning Objectives (for pharmacists):

- Discuss the epidemiology and prevalence of HPV infection in the United States and globally.
- Explain the relationship between HPV infection and the etiology of human cancers.
- Summarize the current recommendations regarding the use of HPV vaccines in susceptible patients in the United States.
- Discuss the efficacy and safety of HPV vaccines.
- Review currently available treatments for the management of HPV infection and its non-oncologic manifestations.
- Outline ways in which pharmacists can promote the use of the HPV vaccine to help overcome vaccine hesitancy.

Learning Objectives (for pharmacy technicians):

- Discuss the epidemiology and prevalence of HPV infection.
- List the major HPV serotypes commonly associated with the development of malignancies.
- Identify those patients in whom HPV vaccination is recommended according to the Centers for Disease Control.
- Recognize common adverse effects associated with HPV vaccines.
- List several topical medications that can be used to manage HPV-associated dermatologic manifestations.
